

Comments

Here are the keyboard shortcuts for manipulating comments.

Shortcut	Command	Description
Ctrl+/ 	Toggle Comment	Add/remove line comments (//...) from the current line. The position of the cursor can be anywhere on the line. Works with multiple selected lines as well.
Ctrl+Shift+/ 	Add Block Comment	Wrap the selected lines in a block comment (/*... */).
Ctrl+Shift+\ 	Remove Block Comment	Remove a block comment (/*... */) surrounding the selected lines.
Alt+Shift+J 	Add Javadoc Comment	Add a Javadoc comment to the active field/method/class. See the notes below for more details on where to position the cursor.
